SUPPLEMENTAL INFORMATION

PRODUCT SAFETY INFORMATION REQUEST REGULATORY COMPLIANCE

Gentlemen:

Over the past several years a number of federal, state, and local laws have been enacted which require manufacturers to provide information on the hazardous components of their products. Since Mobil Oil Corporation purchases new materials from your company, either for incorporation into its product or for manufacturing, we request that you provide the data identified in the attachment to this letter. This information is also necessary for existing and proposed legal obligations.

The attached questionnaire should be completed in its entirety for each and every product. (A list of products which Mobil has identified as being purchased from your company is included. If you are aware of any additional products sold/offered to Mobil we also require the same information.) We also request inclusion of your most current Material Safety Data Sheet for each of these materials. Sign and date the Certification endorsing accuracy and completeness.

We would appreciate your reply, a signed and dated Certification with appropriate detail, to my attention no later than December 7, 1984.

Questions concerning this request should be directed to my attention in writing by return mail or telephone (609) 423-1040 ext. 2344.

Thank you for your responsiveness.

Very truly yours,

R. W. KNUPP
Purchasing agent

I. RIGHT-TO-KNOW REQUIREMENTS

If you wish Mobil to perform the legal analysis on your product, you are requested to provide the CAS number(s) and percent of formulation for each component in the product formulation:

Chemical Name of Component(s)	CAS Number(s)	% of Formulation
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

If you do not want to divulge this information for trade secret reasons, you must furnish the information requested below. If more space is required to furnish specific Right-To-Know data, please use a separate sheet of paper for each such requirement.

Identify each and every hazardous component by Chemical Abstract Service (CAS) numbers and percent (%) of your formulation per the designation of hazardous or toxic substances of the indicated legal requirement. (NOTE: Percentages are required to enable us to determine whether our finished products, which contain your product at various concentrations, are affected by these legal requirements.)

A. FEDERAL LAW

1. OSHA Hazard Communication Rule, 29 CFR Part 1910.1200

<u>Component</u>	<u>CAS Number</u>	<u>Percent</u>
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

B. STATE RIGHT-TO-KNOW LAWS

1. New Jersey Worker and Community Right-To-Know Act

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

VVV 000016237

C. LOCAL RIGHT-TO-KNOW LAWS

1. Township of Pennsauken, New Jersey, Identification of Toxic and Hazardous Substances Ordinance

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

2. Philadelphia Ordinance 475 or 1981

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

D. LABELING

1. Are product labels now in compliance with all Right-To-Know labeling requirements? YES _____ NO _____

- o If no, provide specific detail. _____

PRODUCT NAME _____

II. FEDERAL/INTERNATIONAL DATA REQUIREMENTS

1. Has a product Material Safety Data Sheet (MSDS) been attached?
YES _____ NO _____
o If no, why not _____
2. Is product listed in the TSCA inventory?
YES _____ NO _____
o If yes, under what designation _____
o If no, why not _____
3. Is product listed in the European Inventory of Existing Chemical Substances (EINECS)?
YES _____ NO _____
o If yes, under what designation _____
o If no, why not _____
4. Is product listed in the European core Inventory (ECoin)?
YES _____ NO _____
o If yes, under what designation _____
o If no, why not _____
5. Resource Conservation and Recovery Act (RCRA)
Does product possess the characteristics of RCRA hazardous material?
YES _____ NO _____
o If yes, identify:
- | Component(s) | Concentration |
|--------------|---------------|
| _____ | _____ |
| _____ | _____ |
| _____ | _____ |
| _____ | _____ |
- o Comments, if any: _____

6. Provide complete elemental metal analysis:

Metal	Weight%	Metal	Weight%	Metal	Weight%
Arsenic	_____	Lithium	_____	Chlorine	_____
Barium	_____	Mercury	_____	Bromine	_____
Cadmium	_____	Selenium	_____	Fluorine	_____
Chromium (+6)	_____	Silver	_____	Sulfur	_____
Lead	_____	Zinc	_____	Other(list)	_____

PRODUCT NAME _____

7. Are there any Department of Transportation (DOT) shipping considerations? YES _____ NO _____

o If yes, please provide complete information:

Hazard Class: _____

UN or NA Number: _____

IMCO Class: _____

Label(s) Required: _____
