Re: Unloading of fiber at Owentown Plant

Dear Mr. McMillan:

During negotiations recently concluded with respect to the above plant there were several discussions with regard to the unloading of this fiber at the plant, with the Company taking the position on May 29, 1964 that the employees may elect to unload fiber when not otherwise busy or may go home and the Company would get Manpower to unload the fiber.

We advised you that our preference was to let Manpower do this unloading.

This matter was again the subject of discussion during our final day of negotiations on July 21, 1964, and you in answer to a direct question by Mr. Musick advised that all of the department would not need to go home in the event that there was no other work for the employees in the department, as the clerk was needed along with the man to take production off the line and store it in the warehouse, and there were no objections voiced to this procedure.

Will you please confirm that this correctly reflects the procedure agreed to during negotiations for the unloading of this fiber, and return to me one of the attached copies, saving one for Mr. Kelley, Mr. Bass, and Mr. Musick.

Yours very truly,

Dial Murphay

Dear Mac:

In our various talks with Dial Murphy and the Workmens' Committee, we made some definite statements relative to the repair work and improvements planned for the Tyler plant.

Nick Unkovic reported that Murphy had indicated he had been told we had done very little in the way of improving working conditions and repairing the equipment. This, of course, is not the case.

Will you prepare a list of all the improvements you have made, both in working conditions and in repair of equipment. Please send copies to both Byrl Stout and to me. If possible, please list costs of the work done. We will need this as a part of our pre-negotiation data.

If you could have this for us early next week, it will be very much appreciated.

Yours truly,

C. L. Kelley
