Point 1 – Opening and adoption of the agenda (9:00-9:10 am)

Point 2 – Minutes and action points (9:10 – 9:20 am)

2020-06_16_PFAStESTR-5 Meeting and Aps_Draft_FINAL_TrackChanges.docx

2020-06_16_Continued list of Action Points and their status

Point 3 – Update by Commission on studies AFFF and Textiles (9:20 – 9:30 am)

Point 4 – Update by Commission on restriction proposal on AFFFF (9:30 – 9:40 am)

Point 5 – Updates on discussions related to essential use (9:40 – 10 am)

Point 6 – Update on OECD study on food contact material (FCM) (10 – 10:10 am)

Point 7 – Request from ETH Zürich (via [REDACTED] about publication of information submitted in Call for Evidence (10:10 – 10:20 am)

Point 8 – Discussion of approaches for hazard and risk assessment (10:20 – 11:30 am)

(raised by NO CA as pragmatic approach to ensure same understanding by all group members – maybe NO CA could first shortly reflect their thoughts)

- NL CA will prepare document with short overview of different PFAS restrictions (adopted and under discussions) and the underpinning of these restrictions. Of course persistency is important, but have other hazard characteristics been taken into account by the DS and by RAC/SEAC? And if so, which role have these characteristics played in the process (f.e. supporting, qualitative, quantitative).

See document: *Overview of recent REACH Annex XV Restrictions PFAS_WIP.pptx* (taken from NL CA presentation in WP2)

Break 11:30 – 12 am

Point 9 – Work Packages (12 am – 12:50 am) – short update on discussions, developments and status of each work package by lead

Commented [A1]: We would like all work package lead give short update to group about Kick-Off meetings, new developments and discussion within WP if relevant.

- **WP1 – status of CfE and RMOA**
 - Short update on number of responses received
- **WP2 Substance Identity**
 - Discussion and agreement of further approach on which starting list of PFAS should be used in WP2 and WP3 for screening and degradation pathway analysis etc. (PFAS list of ca. 6800 substances in ECHA's PFAS global PFC Screening approach versus over 4000 substances in OECD PFAS list with an overlap of only ca. 670 substances)
- **WP3 Hazards**
 - Short introduction of Screening approach for HH and Env hazards (including physical-chemical data) to whole group for identification of relevant PFAS/PFAS subgroups for hazard assessment
 - Lists of expectation from WP3 to WP4 in similar way to WP7 since agreement that WP4 collects information on hazards of alternatives and substances as well
- **WP4 Uses**
 - Discussion of scope of sub WP4s – discussion of updated Excel file and issues to be clarified (suggestion of new sub WP4s, clarification of overlap etc. ...)
- **WP5 Analytics**

- **WP6 Monitoring**
- **WP7 SEA**

Point 10 – Action points, next steps & meetings (12:50 – 1 pm)

Industry meeting requests

Discussion of next steps and meetings

Action points

Next WebEx meeting:

- Monday, 20 July ? or 24 August
