Subject: Thermos Division
King Seeley Thermos Company
Norwich, Connecticut

R. P. Monsaert reports that the customer says that the sample submitted of Product E-109 was not to specification, it was too thick and as a result they could not punch out a part. Do you have anything in the correct thickness? If so, please send it directly to Mr. Charles R. Gatti and he will see that it's properly evaluated.

Thickness called for in attached specification is .176 ± .010".

Potential here is 6,000 sheets annually.
