P.O. Box 798
Monteagle, Tennessee 37356

Dear Mr. Boswell:

Last week we had an imspector from the Georgia Department of Agriculture by to check the silo purchased from you. He said that we had had residue showing in samples of milk from the farm. Samples from other farms with Monteagle Silos had proved to be the source of contamination.

Upon checking my files, I found your letter dated November 26,1971. At the time I was not to concerned, as I had not received any notice from the health department. The silage which I later feed had been stored in the silo for some time.

To date, I have not received analysis on the material taken from the silo. Should it prove to be the contamination source, I will need corrective action as soon as possible, due to the fact that in two months, I expect to be filling your silo. If you will please make a tenative arrangment in your plans, should this be the case, it will be very mush appreciated.

Our Monteagle Silo has proved to be a very sattisfactory investment to date and wish to thank you for the opportunity to do business with your company.

Sincerely,

Albert C. Cagle
