EXCEPTION TO THE PCT IMPLEMENTATION PROGRAM PERMITTED WITHIN OVERALL POLICY

J. E. Springgate - B3NA

An exception to our overall policy implementation program has been approved by Pres Cunningham with respect to additional sales of Aroclor 5460 (PCT) to Lava-Simplex International, Inc. This company uses Aroclor 5460 as a component of a unique type of lamp which they call "Lava Lite". A copy of a letter from the president of this company is attached which explains their need for the product.

You are authorized to offer to sell additional quantities of Aroclor 5460 to Lava-Simplex provided the material is shipped to them prior to June 30, 1972, and further provided they sign a hold harmless indemnification agreement and are able to furnish us with evidence of sufficient financial responsibility or insurance to make the agreement meaningful in Monsanto's opinion.

It is my understanding that the quantities involved in this sale would be approximately 30,000 pounds.

W. R. COREY
