ASHRAE GUIDE AND DATA BOOK 1961 VOLUME

Fundamentals and Equipment

The Total Reference That Meets The Challenge Of The Total Approach To Planning, Installation And Maintenance Of Climatic Control And Refrigeration Systems

- 894 pages of important theory and data.
- 67 fully indexed chapters.
- Numerous charts, graphs and tables.
- 350 pages of product specifications.

TABLE OF CONTENTS

Below is a list of all the Sections in this Volume and a sample listing of sub-headings

SECTION I. THEORY

Thermodynamics and Refrigeration Cycles
Thermoelectric Cooling

SECTION II. MATERIALS

Fuels and Combustion
Refrigerants

SECTION III. LOAD CALCULATIONS

Design Heat Transmission Coefficients
Infiltration and Ventilation
Heating Load (Including Winter Climatic Data)
Air Conditioning Cooling Load (Including Summer Climatic Data)

SECTION IV. SYSTEM COMPONENTS

Compressors
Steam Jet Refrigeration Equipment
Heat-Operated Refrigeration and Air Conditioning Equipment

SECTION V. UNITARY REFRIGERATION EQUIPMENT

Beverage Coolers and Refrigerated Vending Machines
Automatic Icemakers

SECTION VI. AIR CONDITIONING UNITS

Room Air Conditioners and Dehumidifiers
Unitary Air Conditioners
Heat Pumps

SECTION VII. REFRIGERATION: CHARGING, CLEANING AND LUBRICATION

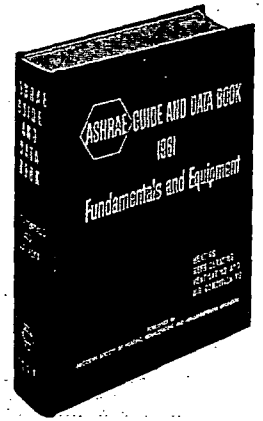
Moisture in Refrigeration Systems
Lubricants in Refrigeration Systems

SECTION VIII. GENERAL

Terminology
Abbreviations and Symbols
Codes and Standards
Physical Properties
Conversion Factors

MANUFACTURERS' CATALOG DATA

350 Pages of Product Facts, Description and Specifications.



The 1961 ASHRAE GUIDE AND DATA BOOK is the first of ASHRAE's new two-volume series, each volume to be reissued biennially with current information. The publication of the 1962 Applications volume has completed the merger of the predecessor ASHAE HEATING VENTILATING AIR CONDITIONING GUIDE and ASRE AIR CONDITIONING REFRIGERATING DATA BOOK. The 1961 Fundamentals and Equipment volume and the 1962 Applications volume provide a comprehensive treatment of theory and current practice in the fields of Heating, Refrigerating, Air Conditioning and Ventilating.

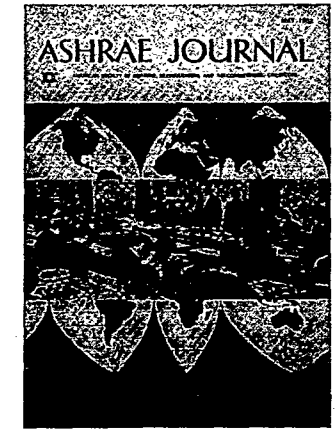
In scope and depth, the 1961 Fundamentals and Equipment volume is one of the most complete reference books ever published by the Society. It contains engineering information essential to the planning, installation and maintenance of climatic control and refrigeration systems.

Price of the 1961 GUIDE AND DATA BOOK on Fundamentals and Equipment is $12.50 in the United States; $14.00 elsewhere.

AMERICAN SOCIETY OF
HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS, INC.
UNITED ENGINEERING CENTER, 345 E. 47TH STREET, NEW YORK 17, NEW YORK

TO KEEP INFORMED,

HEATING REFRIGERATING AIR-CONDITIONING ENGINEERS



READ THE ASHRAE JOURNAL—

21,000 engineers, contractors, sales executives, architects, scientists, educators and students can't be wrong. They all read the ASHRAE JOURNAL . . . official monthly publication of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

WHY THE JOURNAL? In the fields of Heating, Refrigerating, Air Conditioning, Ventilating and allied sciences, there is only one authoritative publication . . . the ASHRAE JOURNAL. Keyed throughout to timeliness and significance, the JOURNAL stands alone. Because of its unique position as official ASHRAE spokesman, the JOURNAL does not follow, but exercises a necessary leadership in its field, unhampered by business magazine restrictions.

- The JOURNAL is edited to excel.
- There is no other single source of comparable knowledge in those areas of interest which the JOURNAL serves.

COMPLETE ENLIGHTENMENT IN JOURNAL READING. The ASHRAE JOURNAL is not a superficial report of Society activities. It reports in breadth and depth on subjects of vital importance to industry and the general public. Without the KNOW-HOW represented by the cumulative research, product development, installation experience and standards work of the Society, there could not be the heating, refrigerating or air-conditioning accomplishments of today. The publication of this KNOW-HOW is the singular mission of the JOURNAL.

The editors have direct access to and exclusive use of all technical, conference and symposium papers presented at national meetings of the Society. Additionally, they seek out and publish thoughtful papers written by member and non-member experts on such dynamic topics as responsibilities of the engineer, developments in physiological knowledge, international relationships, better communications among engineers and the role of a society in improving engineering education.

- new products
- new bulletins and catalogs
- news of regions, local chapters and their members
- applicants for admission
- committee plans and programs
- new books
- trends and changes in industry

There are two ways in which to obtain the JOURNAL. The easy way is to join ASHRAE!! The JOURNAL is circulated monthly to every member as a part of the services made available to him by payment of his dues. The other way—also simple—is to order a non-member subscription . . . $5.00 a year in the U. S. and Canada; $7.00 elsewhere.
