Guidelines for disposal of PCBs overseas should be mailed to world area marketing managers week of March 6. You will also receive a copy and I would appreciate if you could make sure that world area directors are familiar with our suggestions and supervise where necessary. Only in the following areas do I anticipate exceptions to the proposed guidelines:

1. Canada: Will be handled like U.S.A.

2. Europe: MESA responsible for their own program and avoiding any liability to Monsanto.

3. Latin America:

   Mexico: We still have not determined to handle in Mexico or ship back to U.S.A.

   Costa Rica: Monsanto unused consignment stock will be returned to U.S.A. We do not believe we can locate a proper landfill and we do not have a resident Monsanto man to supervise any disposal of this stock.

In other countries we hope to avoid taking material back to U.S.A. for disposal.
