THIS WAY WE'RE CALLED

"LEAD HEADQUARTERS"

The process we have perfected for making lead wire is a close, close brand in several ways. We do it right and produce a strong durable joint.

Quantity of stock necessary for completion, and range of size are these reasons why large users of lead and lead wire come to us for their required stock.

We stock various sizes of lead wire and they are easy to handle and enough to make a good joint and are so made and durable.

Our lead and lead wire tubing is produced by the same process and on the same process as the famous high quality lead wire. It is made in a wide range of sizes.

Our lead wire is produced by an extremely precise method in which long continuous strips of lead wire are drawn and then drawn into the required size.

Our special process for the production of lead wire is a fine quality of lead wire. Three standard sizes can be supplied in 1/2, 3/4, 1, 1 1/2, 2, 3, 4, 5, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Following according to your specifications, we will produce the necessary amount of lead and lead wire. We will also supply the necessary amount of lead and lead wire.

Our lead wire is the same as the lead wire. It is made in a wide range of sizes and is so made and durable.

We maintain a complete stock of lead wire in the quantities of high quality stock. The lead wire includes all the standard sizes and types.

WOOL

WIRE

WEDGES

WASHERS

TUBING

TAPE

SHOT

SASHWEIGHTS

PULVERIZED LEAD

GASKETS

FLANGES

CAMES

Into about 100,000 different shapes, bolts and nuts are the principal lead products, there are many other shapes and forms which industry requires as the folder shows.

We take pride in the fact that our standard line includes not only the principal lead products but all the other shapes and forms as well. In fact the full list covers such a broad range that many metal buyers regard us as "lead headquarters".

If you use lead in any form we would appreciate an opportunity to serve you. Perhaps you will find that the item you have been buying and paying for as a "specialty" is a regular part of our line.
