SUBJECT: Therminol FR-2 - skin contact incidence

REFERENCE:

TO: DR. E. R. KELLY - EKELL

Dr. Kelly, attached is a letter from an equipment manufacturer, International Boiler Works, citing an incident of accidental skin exposure to hot Therminol FR-2 (Aroclor 1248).

A written response to Ed Mordt from your office describing proper first aid procedures for skin contact with hot or cold Therminol FR (Aroclors) fluids would be appreciated.

International Boiler Works have been extremely helpful to our Therminol sales effort over the years. We would also appreciate your response to IBW to assure their continued support to our Therminol programs.

Thank you,

D. E. Roush
