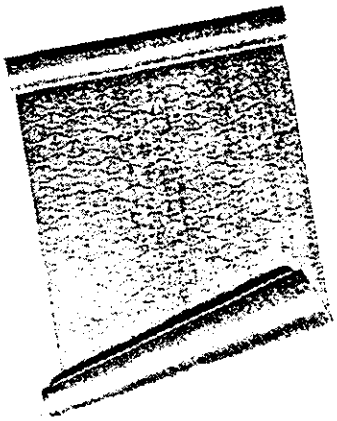
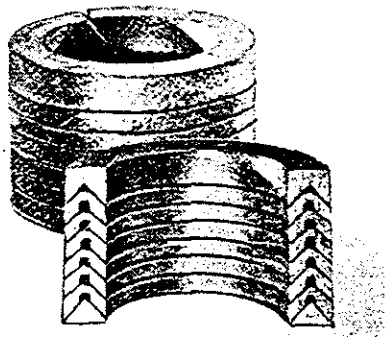
Why neutral grounding influences electric system design 60
How proper steam-trap maintenance can pay dividends 64
Combined steam-gas cycles offer savings to industry 68

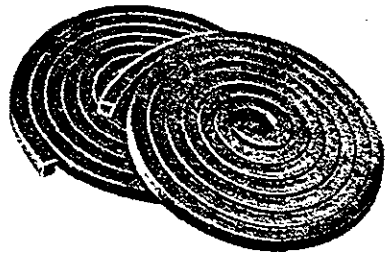
WHAT'S NEW FROM GARLOCK



COMPRESSED ASBESTOS GASKETING. Ideal in applications employing rigid flanges with adequate bolting capacity . . . such as water and steam pipe fittings and manifold connections. Garlock 7021, of chrysotile asbestos with SBR binder, is recommended for service against hot oil, hot gases and steam. Tough, durable, with compressibility for positive sealing . . . yet resistant to plastic flow common under heavy bolt loads. Complete gasket cutting facilities in Palmyra, N. Y., Philadelphia, Houston and Toronto, Ont. Write for AD-190.



CHEVRON® PACKING. Garlock 431, of cotton duck and neoprene, resists oil, water, air and dilute acids at temperatures to 250° constant. Because of exclusive hinge-like construction, Chevron rings tighten automatically to prevent leakage as pressures increase . . . ease off to permit free operation without leakage as pressures decrease and offer minimum friction during operation. Ideal for sealing rods, rams, pistons. Top and bottom adapters are available in a wide variety of materials to compensate for worn equipment and excessive clearances. Only Garlock makes Chevron packing. Write for AD-115.



ASBESTOS LATTICE BRAID® PACKING. Garlock 733, a relatively soft packing, lubricated and graphited for general service against water and aqueous solutions. Unique combination of highly specialized braiding equipment and over twenty years experience in the manufacture of Lattice Braid assures you packing of unsurpassed quality. Lattice Braid structure gives greater strength, longer life and less downtime. Customer preference for Lattice Braid has necessitated a 33% increase in braiding capacity to meet demand.

AVAILABLE FROM FIFTEEN STOCK POINTS THROUGHOUT UNITED STATES AND CANADA
