#### QUARTZ ROUNDTABLE PROCEEDINGS

This transcript of the December 1972 two-day Quartz Roundtable presents the current state of the art of research and practice for quartz analysis. Representatives from both the United States and Canada discussed the strengths and weaknesses of X-ray, infra-red, colorimetric and differential thermal analysis techniques. Participants represented a cross-section of official agency, industry, and research interests. In addition to the formal presentation, discussions are also presented.

#### COTTON DUST - PROCEEDINGS OF ACGIH TOPICAL SYMPOSIUM

Contains papers from the November 1974 two-day meeting in which new data on epidemiology, etiology, environmental factors, and measurement were presented. Floor discussion and a panel discussion on the NIOSH Cotton Dust Criteria Document are also included. The potential health hazards of working with cotton and methods of prevention are given as seen from the viewpoint of research scientists, State and Federal government, industry and labor. The most comprehensive review of the entire problem published to date.

Single Copy - \$5.00

#### WORKPLACE HAZARD MONITORING - PROCEEDINGS OF ACGIH TOPICAL SYMPOSIUM

Contains papers from the December 1975 two-day meeting in which environmental and medical monitoring programs were examined for use by employers (small, medium, and large in size) in meeting occupational health standards. The "how to do it" was emphasized in both formal presentations and in discussions (also included in this document).

Single Copy - \$7.00

#### WORKPLACE CONTROL OF CARCINOGENS PROCEEDINGS OF ACGIH TOPICAL SYMPOSIUM

Contains papers from the October 1976 two-day meeting in which experts from universities, industry, labor, and government led the exploration of appropriate approaches to recognition (definition), evaluation and control of workplace carcinogens. Also included is the discussion of both speakers and attendees on these topics. Available June 1977

#### RECOMMENDED PROCEDURES FOR SAMPLING AND COUNTING ASBESTOS FIBERS - 1975

A detailed protocol for determining the airborne concentration of asbestos fibers in the workplace prepared by the joint ACGIH-AIHA Aerosol Hazards Evaluation Committee. It provides the technical details not given in the brief footnote to the Asbestos TLV of ACGIH which specifies: "As determined by the membrane filter method at 400-450X magnification (4 mm objective) phase contrast illumination."

Single Copy - \$1.00

#### BACKGROUND DOCUMENTATION OF EVALUATION OF OCCUPATIONAL EXPOSURE TO AIRBORNE ASBESTOS - 1975

A critical literature review of the health hazards associated with occupational exposure to airborne asbestos fibers, and of the techniques used to determine inhalation exposures. Prepared by the joint ACGIH-AIHA Aerosol Hazards Evaluation Committee, this work serves in part as the background documentation for "Recommended Procedures . . ." listed before.

Single Copy - \$1.00

#### TRANSACTIONS OF ANNUAL MEETINGS

Each year the official report of the annual meeting of the Conference is issued. Included in the Transactions are copies of papers presented by members at formal sessions of the meeting along with minutes and copies of material presented and discussed at the business session. The most current Transaction is mailed unless otherwise indicated. Members receive their copy automatically if their annual dues have been paid. Size varies from about 100 to 300 pages. The report is usually available approximately 4 months after yearly meeting.
