Memo for Files

I mentioned to Mr. Berman and also to Dr. Claremont my chagrin that the Pulmonary Services at New York Hospital was not interested in doing an asbestosis study. They both expressed surprise that the pulmonary medical group did not express some enthusiasm for this as they are short of funds. Dr. Claremont agreed to rediscuss it with the doctors, and Mr. Berman will take it up with Dean Bob Buchanan and see if he can pressurize them in reconsidering doing a possible five refineries asbestosis study.

H.A. Sinclaire, M.D.
