SUBJECT HOURLY SAFETY COMMITTEE MEETING - TUESDAY, FEBRUARY 27, 1979

REFERENCE

TO : File

Present	Absent
Jim Froeble	John Clemmon
Gerry Berry	Dudley Packard
Jack Linkey	Don Barnhill
Joe Lowe	
Herbie Townsend	
Hugh Bowen	

A. Old Business

1. Answers were given to all items on which concerns were expressed in meeting of 1-30-79.

B. New Business

1. According to Joe Lowe, there were five incidences with fresh air masks not working properly during the February, 1979 entry into the Cold Box (Dept. 46). Safety meetings were held by Vernon Mapes after the incidences and Manufacturing was made aware of the problem.

2. Joe Lowe mentioned that several insulators were burned with phenol while stripping a line. This was a repeat of a similar incident which had happened before.

3. Jim Froebel brought out what he thought was an old item of an off/on switch on a phenol pump. Apparently the switch was located where it was very easy to get sprayed from a leaking seal.

SC 17143

LAM025395

4. A few members of the Committee were concerned about trucks entering the plant labeled "MILK" and actually transporting chemicals such as Food Grade Lactic Acid.

5. The Committee felt that the Unit Safety Promotion Teams are very under utilized in some areas.
