Terry L. Leet
Epidemiologist
Environment, Safety & Health
Monsanto Company
800 N. Lindbergh Boulevard
St. Louis, Missouri 63167

Dear Terry:

I have enclosed a draft of the Ascertainment of Exposure section of our final report for your review and comment. I have summarized the exposure information that you, I, and Mr. Garrett have collected over the past many months. There are still a few gaps in our knowledge, particularly regarding old job descriptions, but these are small relative to what we have learned. Please share this draft with Dr. Spraul and whoever else he might think appropriate at Monsanto. I have also forwarded a draft to Mr. Garrett for his review.

Once you and Mr. Garrett have reviewed this draft and made your corrections, I would appreciate if you would forward the update to Dr. Fingerhut at NIOSH. As you know, she has agreed to provide us with the exposure scores on the employees that we share in return for this information.

Thank you for your continuing assistance in this study.

Sincerely,

Daniel Hryhorczuk, M.D.
