Gentlemen:

Enclosed is a particularly unpleasant diatribe entitled, "Behind the Lead Curtain" by Mrs. Polly Roberts. This article appeared in "Clear Creek" of San Francisco which appears to be a sort of ecological "Confidential". A news release was also issued by Clear Creek outlining the charges of "suppression" made in the article. I don't know the extent of the pick up of this release by newspapers.

I thought that this article was noteworthy because of its degree of viciousness.

Sincerely,

J. F. Cole, Sc. D.
Manager, Environmental Health
