TO : F. D. Ramsey

I understand that you have compiled some data on the theoretical Aroclor losses to the atmosphere at the HCl scrubber jet. I am interested in the method which you used in getting this data, as well as what you were able to find out. Your method should prove most helpful in projecting what the losses are expected to be in the remainder of the Aroclor department.

I would appreciate this information as soon as possible since I plan to begin writing up a plan for the plant program next week.

Thanks,

Ramsey
