PCB/PCT SALES

cc: H. S. Bergen
W. R. Corey
W. E. Schalk
J. E. Springgate
J. F. Stapleton

TO : W. B. Papageorge

In your letter of June 27, 1972, you asked that I certify the status of the Aroclor withdrawal program. I believe that the statements below should accomplish your purpose.

1. To the best of my knowledge and belief, all sales of PCB-based plasticizers to areas other than the U. S. and Canada were terminated prior to January 31, 1972.

2. With two exceptions, sales of all monochlorinated biphenyl/PCT sales were terminated domestically on March 31, 1972, except for those few customers who signed hold-harmless agreements. The exceptions were 1) Minnesota Mining and Manufacturing was shipped one drum (600 pounds) of Aroclor 6050 on April 10, and 2) H. B. Fuller was shipped five drums (2,250) of Aroclor 5442 on April 5. While these shipments were not authorized by me, I assume responsibility for their occurrence and will be glad to review them with those concerned.

   To the best of my knowledge and belief, all monochlorinated biphenyl/PCT sales outside of the U. S. were terminated on March 31, 1972, except for those few customers who signed special agreements limiting Monsanto's liability.

3. All monochlorinated biphenyl/PCT sales to those domestic customers who signed "hold-harmless" agreements were terminated prior to June 30, 1972. To the best of my knowledge and belief, sales of all monochlorinated biphenyl/PCT sales outside of the U. S. to those customers who signed special agreements limiting Monsanto's liability were terminated on or prior to June 30, 1972.
