Therminol FR Usage Within
Monsanto Plants

B2NB
J. R. SAVAGE

Jim, reports from several Monsanto locations now using Therminol FR fluids would indicate that they have not received notification of our termination of this product.

May I suggest that our manufacturing liason representative be the initiation point for notifying our plant personnel of the discontinuation of Therminol FR fluids. Further, you may wish to modify some of the services available as stated in the December 15 letter to our customers. For example, engineering assistance for conversions could be handled through the local TSD or central engineering group as opposed to using the conversion engineers presently on assignment with the product group.

I have attached a copy of the December 15 letter for your consideration in generating a notification of discontinuance of the Therminol FR series fluids to our plant personnel.

Please call if you have alternate suggestions.

D. E. Roush
