Mr. R. M. Kountz
Monsanto Company
800 N. Lindbergh Blvd.
St. Louis, Missouri 63166

Dear Mr. Kountz:

Waste Incineration

we have since

It is unfortunate that we have not made more direct contact in regard to your letter of October 24. Since I will be away from Mound Laboratory until November 17, I am sending you several names which may be of assistance to you. We wish we did but do not have access to any recommended government installations or designs for incinerators. People we have been in contact with over the past two years include:

Mr. John Copeland, Chief, Engineering Section
National Air Pollution Control Administration
411 W. Chapel Hill Street
Durham, North Carolina, 27701

Mr. John McGinnity - above address

Mr. Victor Soblinski above address

The Government currently has a contract with an area architect-engineering firm for the design of an incinerator for Mound; this design should be completed late this year.

DSW 162302

STLCOPCB4040912

This same firm had a significant role in the design of the Montgomery County incinerators; construction and installation for these also should be completed by the end of the year. We will be pleased to send you a set of plans and specifications for the Mound installation as soon as they are available.

Please contact myself or Mr. Wayne W. Russell, our engineer for the Mound project, if you would like a set of these plans or if we can be of any further assistance.

Very truly yours,

F. L. Halbach, Manager
Facilities Engineering
