Legislature OK's PCB Restrictions

LANSING (AP) — A bill severely restricting the manufacture, sale and use of the toxic chemical PCB in Michigan is headed for the governor's desk after unanimous approval in the House.

The House gave the measure final legislative approval Tuesday. Its sponsor, Rep. David Bonior (D-Mount Clemens) called the action "a giant step forward in preserving our resources." PCB has been linked with the deaths and reproduction failures of many Michigan fish and fish-eating birds and animals.
