These photos taken July 18, 1968 show progress over the last five working days.

Photo 1 looks south - warehouse office is nearing completion - the warehouse floor has been poured.

Photo 2 shows electricians and painters using the new floor - painters on scaffold in left center, electricians on the right with three interior lights up and visible.

Photo 3 through 5 pan from north (3) to almost west (5) showing warehouse, tank farm and pipe bridge.

It's moving along quite well - we haven't had rain for a week.
