Attached are several copies of the North American Precis Syndicate (NAPS) release on the East St. Louis Urban Gardening project. This was drafted after the harvest last fall, then held until spring so it would be picked up during the planting season. In addition to your approvals, Sr. Cecilia of Operation New Spirit, and Sue Kohler, SIUC, also reviewed and approved the copy.

As you know, NAPS distributes these pre-set, camera-ready stories to thousands of newspapers across the country. They are usually picked up by smaller publications including suburban and rural papers, and regional city papers. As I receive placement reports, I'll pass them along to you.

Thanks for your assistance.
