Interpace
North Parkside Drive
Pittsburgh, California 94565

Gentlemen:

We understand that several years ago you purchased from the Cabot Corporation their Division which manufactured Wollastonite. We are interested in learning the availability of this material, and if you can now supply this Calcium Meta Silicate, we should be grateful if you would forward a 5 lb. sample of both lump size, and -100 mesh material, to the attention of our Mr. Derek Helliwell c/o Mrs. B. Bush.

At the same time, will you please send, to my attention, complete technical information regarding chemical analysis, gradings available, bulk density, etc., together with any technical bulletin you may have, and a price quotation.

Your cooperation in this matter is much appreciated.

Very truly yours,

FOSECO, INC.

Frank S. Bilton
