April 28, 1976

Mr. Arden B. Wald
Lysne Construction, Inc.
107-5th Ave. S. E. Box #518
Blooming Prairie, Minnesota 55917

Dear Mr. Wald:

Reference is made to our phone conversation on April 27. Aroclor is an insulating material used in transformers and capacitors. Aroclor contains polychlorinated biphenyls (PCBs) which some studies have shown may be persistent, an environmental contaminant and, possibly, injurious to certain kinds of bird, aquatic and animal life. In view of this, you must prevent any entry into the environment through spills, leakage, disposal, vaporization, re-use of containers or otherwise.

Therefore, I would offer the suggestion that you return this material to Monsanto for incineration. You may obtain a letter outlining return procedures, precautionary labels, etc. by calling toll free 800-325-3850. Please ask for Charm Russell or Cliff Field. The incineration charge is 10¢/lb. plus $8.00 per drum handling charge, and freight is paid by the customer to Sauget, Illinois.

Another alternative would be to send the material to a landfill which is approved by the Environmental Protection Agency (EPA) for the disposal of PCBs.

Sincerely,

James A. Alley
Industrial Sales Representative
Dielectric Fluids
