

1 Q Now, inside the garage on East Preston
2 Street, can you describe the size of the garage?

3 A The garage ran the whole block, the block
4 from Preston to Biddle. It was sort of a
5 catty-corner.

6 Q When you started working there, how many
7 other garage men like yourself and Mr. Wood would work
8 per shift?

9 A You had at least six per shift.

10 Q And how many shifts were there?

11 A Three shifts.

12 Q Besides the garage men, were there any
13 other trades that worked in the garage?

14 A They had mechanics, you had a body shop, and
15 you had a shop that made seats and things at the
16 time.

17 Q And approximately how many mechanics worked
18 per shift?

19 A I would say at least six.

20 Q So is it fair to say that the operation of
21 that post office garage was around the clock?
