APPENDIX NO. II

SAFETY INSTRUCTION SHEET-HEAT EXCHANGERS

FORM MFG. 600-4

NO.	SUBJECT	DISCUSSION
1 to 26		Refer to Appendix I as required for notes 1 to 26.
27	DESIGN SHEET NO.	Use number assigned to Form EF-18.
28	TUBE MATERIAL	Identify by one of the following in the order listed: (a) ASTM designation giving type and grade (b) AISI type number (c) Name as "steel," "admiralty," "monel," "18-8 Cr. Ni.," etc.
29	LIMITED BY	Refer to note 15 - Appendix I. In those instances where suppliers report the MAXIMUM ALLOWABLE PRESSURE NEW as equal to the design pressure the limiting condition should be noted as "Mfgr's. Nominal Rating" unless some other specific limitation is given as "tube sheets," "flanges," etc., and it is evident that the maximum allowable and design pressure rating are equal.
30	SHELL COVER MATERIAL	The material designation for the shell cover, channel, channel cover, floating head, and tube sheets should be noted as "steel," "cast iron," "NRB," etc., as applicable.
31	LININGS	Where linings are employed the appropriate items should be marked with an asterisk and the material and installation of the lining described; e.g., "13 gage monel button welded," "20% monel clad," etc.
