FILE NAME: Mead (MEAD)

DATE: 1971 Jan 25

DOC#: MEAD049

DOCUMENT DESCRIPTION: Memo

Jan 25, 1971

From: [redacted] L. McLean

To: W.R. Bond

Our policy on keeping the lungs of employees at Raylene has been to keep out individuals prior to employment, then in 1969 we X-rayed all employees with negative results. We plan to X-ray again during 1971 in conjunction with retirement exams, if this again proves negative we will plan in another two years to X-ray again.

We are installing improved dust collection equipment for the finishing lines at Raylene, which have not at present taken dust counts, this was discussed with Litton Mooney after a visual inspection tour and decided to withhold until some future date.

L. McLean
