SUBJECT : PCB ANALYSIS - GENERAL ELECTRIC CO.

REFERENCE :

TO : W. R. Richard
T3A

We have received the soil core samples from General Electric's Pittsfield plant and will begin analyzing them for PCBs shortly. The analysis of these samples should help them convince the EPA that some of the PCBs in their effluent are coming from Aroclor which was spilled in the past, i.e., background.

We also are planning to review with them the best way of calculating the levels of Aroclor 1254 and Aroclor 1260 in samples containing both to make sure that they are correctly subtracting background PCBs from current PCB losses.
