R. A. Stohr

SUBJECT: Litton-Bionetics Report entitled "Effects of PCB on the Reproductive Performance of the Rhesus Monkey"

REFERENCE:

TO J. H. Craddock - A2SA

FEB 10 1981

Enclosed is a copy of the above-subject draft report for submission to interested attorneys. The changes which George Levinskas or I have requested are merely requests for clarification and do not affect the conclusions of the report.

The study director at Litton Bionetics, David Martin, is going on sabbatical leave overseas starting March 14, 1981, so we plan to go ahead and arrange for issue of the final report. Please let me know, as soon as possible, if any changes are indicated.

Peter E. Berteau
