FROM: R. C. Ericson SUBJECT: Changeover to MK-4(67C)

CC: See Distribution List

PLAINTIFF'S EXHIBIT WRG-675

In my memo of 6/14/72, I advised you of plans to eventually change to MK-4(67C), a glass-fibered formula. We are now preparing a schedule of test batches for plants making the switch from MK-4 to MK-4(67C). As a first step, Purchasing has placed orders with Owens-Corning to ship you a 40# box of chopped fiber. In the future, we will be referring to this material by its code name, OWCH. We have asked Owens-Corning to have this in your plants by July 18th.

I request that each of you call me or Janice Sawyer upon receipt of the glass fiber. We will then give you the proposed formula and test batch pattern for Travelers Rest evaluation for material from your plant. Since Milwaukee and Trenton have already participated in some of the plant-scale research testing, we may not schedule any further Travelers Rest evaluation testing at these plants. Glass is being shipped to these two plants to cover the possibility of furnishing materials for field testing.
