Dear Myrle:

The attached general memo is selfexplanatory and involves the conversation we had with INA during your visit to Medina.

Please follow through as we discussed to have the individual plant managers and one back up person at each of your PENCO plant locations trained in the use of the dust monitoring equipment when it is there for a routine check and/or perhaps you can arrange to do this when you're planning your next general plant managers meeting at a central location and they can all be trained at one time by one laboratory to follow through and then give us a letter of certification to this effect. Thanks!

Cordially yours,

Julius Nemeth
