

HEATING VENTILATING AIR CONDITIONING GUIDE 1939

Insulation (continued)
to prevent condensation, 139, 750
to prevent freezing, 749
reflective type, 92, 93
rock wool type, 745
of sound, 805
tables, 95, 740
thickness needed, 752
underground, 753
of vibration, 753
ionization of air, 73
isobaric, 841
isothermal, 7, 841

J-K-L

Joints, expansion, 365
Kata thermometer, 829
Lag in heat transmission, 153
Latent heat, 31, 841
loss, 70
of water vapor, 12
Lateral exhaust system, 655
Leader pipes, 384
heat carrying capacity of, 385
size of, 385, 395
Leakage of air, 199, (see also Infiltration)
Lignite, 173
Liquid, heat of the, 28, 840
Lithium chloride system of adsorption, 45, 486
Load,
building factors, 246
cooling, 145
design, 257, 339
heating, 131
maximum, 339
radiation, 339
Low temperature insulation, 749

M

Machinery,
as heat source, 138, 157
mountings vibration, 587, 605
sound insulation of, 605
Magnesia insulation, 740
Manometer, 827, 841
Manual control, (see Controls)
Masonry materials, heat transmission through,
95
Mass, 841
Mb, 337, 841
Mbh, 337, 841
Mean radiant temperature, 770, 774
Mechanical,
draft towers, 533
equivalent of heat, 841
fuel burning equipment, 207
refrigeration, 35
ventilation, 75
warm air furnace systems, 399
air distribution, 402
design of, 405
register and grille locations, 403
Medical treatment, (see Diseases)
Mental trouble, 623
Mercurial thermometer, 825
Metabolism, 51, 71
Meters,
choice of, 790
condensation, 791
fluid, 790
Nicholls heat flow, 833
steam flow, 791
types of, 790
water, disc, 805
Methyl chloride, 35, 88, 529
Metric units, 850
Micromanometers, 824
Micron, 79, 841

Mixture, air and water vapor, 12
Modulating control, 703
Moisture,
content,
of air, 70, 145, 521, 643
capillary or free, 669
of hygroscopic materials, 644, 669
loss by human body, 74
from outside air, 156
produced by cattle, 695
regain, 643

Mol, 841
Monofluorotrichloromethane, 35, 40
Motive power, 719
Motors, electric, 719
adjustable speed, 720
adjustable varying speed, 720
alternating current, 721
application of, 724
capacitor type, 722
characteristics of, 720
classification of, 724, 725, 726
compound wound, 719
constant speed, 720
control equipment for, 727
automatic, 728
manual, 727
multispeed, 730
pilot, 728
single phase, 732
slip ring, 731
damper, 701
direct current, 719
control of, 729
speed characteristics, 724, 726
as heat source, 157
induction,
automatic start, 726
capacitor start, 722
repulsion, 722
repulsion start, 723
slip-ring wound rotor, 726
squirrel cage, 723
polyphase, 723
selection of, 663
series wound, 719
shunt wound, 719
single phase, 732
special applications, 727
split phase, 723
synchronous, 721
varying speed, 721
MRT, mean radiant temperature, 770, 774

N

Natural draft towers, 533
Natural ventilation, 70, 687
Nervous instability, 625
Neurosyphilis, 621
Nicholls heat flow meter, 833
Noise, (see also Sound)
air outlet, 572
in buildings, 602, 605
control of, 602
through ducts, 609
through room wall surface, 609
with warm air systems, 402
equipment, 604
kinds of, 604
level,
acceptable, 603
of fans, 557
measurement of, 602
through building construction, 605
Nozzle, 517
air spray, 517
oil atomizer, 218
water spray, 517
Nurseries, 618
equipment for, 620
requirements for, 619
ventilation rate, 620

ALPHABETICAL INDEX TO TECHNICAL DATA SECTION

O

Odors, 67
of human origin, 49
concentration, 68
removed by outside air, 69
Off peak heating, 764
Oil, oils,
atomization of, 219
burner, burners,
air for combustion, 218
air supply for, 218, 224
boilers, 221, 222
burning rate chart, 235
classification, 179
combustion, 233
for commercial use, 221
control of, 225, 714
design considerations, 223
for domestic use, classification, 218
efficiency of combustion, 225
flame with, 219
furnace requirements, 252, 400
ignition, 219
oil consumption, 233, 235
operation, 218
Orsat test, 225
specifications, 179
types of, 219
calorific value of, 181
classifications, 179
as corrosion inhibitor, 381
gages, 225
ignition of, 180, 218
preheating, 220
specifications, 180
One-pipe steam heating systems, 281, 841,
(see also Steam Heating Systems)
Openings, 689
air inlet, 691
for natural ventilation,
location of, 691
size of, 688
types of, 689
Operating rooms,
anesthesia, 615
explosion hazard, 615
humidification, 616
static electricity, 616
ventilation, 616
Orifice, orifices,
friction heads, 349
steam heating systems, (see Steam Heating Systems)
Orsat test apparatus, 218, 225, 229, 832
Outlets, (see also Registers, Grilles)
design and location of, 577
Oxygen, 381
Oxygen therapy,
diseases treated, 623
oxygen chambers, 624
oxygen tents, 623
Ozone, 75

P

Paint,
effect on radiators, 271
spray booths, 658
temperatures and humidities for processing,
640
Panel radiator, 842
Panel warming, 842
Partial pressures, Dalton's law of, 1
Perspiration, 49, 51, 71, 73
Peterson-Palmquist apparatus, 831
Pipe, piping, 361
bare, heat loss from, 735
bends, 368
capacities, (see Pipe, Sizes)
coil radiators, 269

Pipe (continued)
conduit, 754, 783
connections, 320, 786, (see also Connections)
copper, 362
corrosion of, 380
dimensions of, 362, (see also Pipe Sizes)
district steam, 781
expansion of, 365
fittings, 361, (see also Connections, Fittings)
for water supply, 804
welding fittings, 372
flanges, 376, 739
flexibility of, 365
freezing,
prevention of, 749
friction, 807
of air in, 584, 585
heads in, 342
gaskets, 366
hangers, 370
heat loss from, 739
cost of, 735
for hot water heating systems, 337
insulation of, 735
joints, 365
leaders, 384
radiating surface, 738
radiators, 269
refrigerant, 478
scale in, 380
sizes, 341
for black iron, 343, 344
for boiler runouts, 322, 782
for central fan systems, 331
for convector connections, 328, 329
for copper tube, 343, 345
forced circulation systems, 343
gravity circulation systems, 351
dimensions, 362, 365
for district heating, 782
for domestic hot water, 810
elbow equivalents, 346
equivalent length of run, 312
friction head, 342, 343
of orifices in unions, 349
for Hartford return connection, 322
for hot water heating systems, 341
for indirect heating units, 331
mains, 806
for pipe coil connections, 328
for radiator connections, 326
refrigerant, 3, 307, 478, 480
return, capacity of, 316, 783
steam, 308, 315, 316
underground, 783
tables, 314
tees, 370
for underground steam, 783
for water supply, 803
weights, 367
steam, capacity of, 311
for steam heating systems, 281, 307, (see
also Steam Heating Systems)
supports, 370
sweating, 750
tax, 259
tees, dimensions of, 373
threads, 369, 371
tunnels, 786
types of, 361
underground,
insulation of, 753
steam, 783
for unit heaters, 438
valves, 376
water supply, 799
weights of, 362
welding, 372
Pitot tube, 827
Plastering materials, heat transmission through,
99
Plenum,
chamber, 842
systems, automatic control of, 704
