VII (4) YES REPORT ONLY

November 20, 1968

Mr. Byrl W. Stout
Vice President - Manufacturing
Pittsburgh Corning Corporation
One Gateway Center
Pittsburgh, Pennsylvania 15222

Dear Mr. Stout:

Subject: Evaluation Of Dust Hazard Control In Unibestos Operation
- Port Allegany - August, 1968

Attached for your information and appropriate action is a cover letter and report from Dr. Morton Corn and also a bill for professional services rendered.

The subject evaluation indicates the need for a major redesign of the present dust collecting system to effect asbestos dust control within the plant to safe levels.

Dr. Corn has agreed to assist in the above redesign at such time as you require. For this further assistance, you may contact him directly.

Sincerely,

Lee R. Grant, M.D.
Medical Director

Dr. Lee Grant
Pittsburgh Plate Glass Corporation
One Gateway Center
Pittsburgh, Pennsylvania

Dear Lee:

The Port Allegany Plant survey report is enclosed. As you will see, my opinion based on the data obtained is that a redesign of the exhaust system is in order. I am fully aware of the future efforts associated with this recommendation but cannot reach any other conclusion in view of the measures taken to ensure that the system was operating at high efficiency during my survey. Thus, at best performance, it is just not good enough.

In accordance with your request, the report does not dwell on design aspects because our purpose was to determine where we stand at present.

Sincerely yours,

Morton Corn
