Dear Don:

I am sending you copies of three articles on Marek's disease that are reasonably current and I think contain much of the information you have requested concerning Marek's disease. I am sending these to you, however, since you may wish to review the material before sending it on to your company consultant. I hope this is satisfactory.

I think Dorothy is planning to go with me to the A.V.M.A. convention in New Orleans this summer. I hope she persists in this intent.

Best wishes to all of you in 1972.

Sincerely,

Ray
