Aroclor 1242

March 1969 Monthly Report

M. W. Dietrich
JFQ Plant

In the March 1969 Monthly Report it was stated that a mass spectroscopy study was made of WGK 1242.

I would be interested in a copy of the information concerning major isomeric components with respect to the gas chromatograph analysis.

If a report has been issued on the complete scope of the investigation, please send me a copy.

Sincerely,

This Copy For

E. E. Bowles
