CONFIDENTIAL

New Statement:

Based on our extensive investigation of the PCl3 release at Monsanto's Krummrich plant in Sauget, Sunday morning, and reports from the local hospitals, we've concluded that a vast majority of those who sought treatment were unaffected by the release.

Therefore, because the extent and duration of the incident was so minimal and affected so few, for the majority of cases we will cover only related hospital expenses through payments directly to the hospitals.

If anyone feels they truly may have been affected, we will be happy to talk with them on an individual basis in addition to covering their hospital charges.
