Attention Mr. B. E. Kidner

Dear Mr. Kidner:

MCS 1131-Experimental Station

I apologize for the delay in replying to your purchase order X-56789 for 1000 pounds MCS 1131 (decachlorodiphenyl). As we had previously explained by telephone this material can be released only on the signing by DuPont and Monsanto of a hold harmless agreement. The need for such an agreement results from the current environmental pollution allegations and proposed FDA regulations concerning PCBs. MCS 1131 is chemically a polychlorinated biphenyl or PCB.

We attach a copy of a Hold Harmless Agreement that is acceptable to Monsanto in order to release 1000 pounds MCS 1131. Should you have any questions concerning this matter, please contact Mr. Phocion S. Park, Senior Attorney for Monsanto Industrial Chemicals Company at (314) 694-2807.

Very truly yours,

Cumming Paton
Product Manager, Fluids
