Do you want to follow up on this or should we just send samples?

April 5, 1979

VI.E.9

Gentlemen,

We are interested in purchasing various types of relatively pure asbestos for our quality control program. We need about one pound (500g.) or less of material. If you can supply us, please let us know, and also what the approximate purity is.

We are also interested in knowing where we can purchase laboratory size quantities of Polyox (water soluble resins).

Sincerely,
Walt Neville
