The EPA report to OECD showing PCB information for 1974 indicates that 48,000 pounds of a 42% chlorinated biphenyl were imported into the U. S. for use in hydraulic fluid, and 330,000 pounds of a 60% chlorinated terphenyl was imported for use in investment casting waxes. Both of these materials originated in France.

No receipt of decachloro biphenyl from Italy was reported in 1974.
