INTERDEPARTMENTAL COMMUNICATION

DATE: November 29, 1972

TO: Mr. G. E. Wilson

LOCATION: Portland

FROM: T. W. Richards

LOCATION: Tigard

SUBJECT: Speed Set

We have been in the process of making an engineering study to facilitate the manufacturing of speed set in the Blue Rapids plant. Our main concern is contamination of either the speed set or our industrial products. We have also reached the point where it is no longer possible to handle all packing on a one shift basis. The study of going to an additional shift is also being carried on. I would hope our study will be completed by January 1, 1973. Perhaps Research will have an alternate formulation so that when we stock raw materials we can stock only those required for the improved speed set products.

SPEED SET

cc: Mr. T. W. Richards - Tigard
Mr. O. E. Burch - Portland
Mr. R. D. Meyer - Portland

I am confident that we can improve the current Speed Set fromula and also reduce the formula cost. We will concentrate some effort on the Speed Set and see what we can come up with.
