Page 13 of your memo titled Ex USA / Canada Dielectric Sales and dated 17th March suggested that a reworded plaque be given to the transformer industry.

The fact that we've whipped the name Pyroclor and Monsanto off the plaque is making the transformer manufacturers a bit suspicious as we appear to be dissociating ourselves from their PCB problem.

To counter this we have drafted the attached letter which we would propose sending to all the transformer manufacturers and a suitable modified version to the capacitor manufacturers.

Any comments or suggestions you may have would be appreciated.

Seems like a good idea. If in agreement scribble "yes" + return & I'll pass on to John H.
Thx S.
