PLAINTIFF'S EXHIBIT CEL-633

SUBJECT: Purchasing Safety Equipment

The Occupational Safety and Health Act (OSHA) requires that personal protective equipment meets certain criteria as stated in Part 1910 of the Federal Register. The Safety section budgets for items required by policy (Safety glasses, safety helmets, hearing protection, etc.). Safety is responsible for assuring management that only OSHA/NIOSH approved safety items are used. Training, when necessary, will also be provided by Safety.

To help us fulfill our responsibility and avoid duplicate purchases, all Safety related purchase orders should be prepared by the Safety Supervisor or routed through him for his input and co-signature prior to its being sent to Purchasing.
