SUBJECT : CMA Survey Data On Incidental PCB's

REFERENCE :

TO : C. F. Callis - B3CA
R. L. Harness - C2SA
F. E. Kearney - E2SA
W. B. Papageorge - G4NH

Attached for each of you are copies of the information submitted to CMA during their survey of generation of "incidental PCB's" for EPA in 1981 for your respective company. The data is sent to you on the basis of Monsanto's current organization.

As you can see from the printed form actually submitted to CMA's "blind" contractor, no individual process was identified; only quantities of PCB and the basis of the estimates. Handwritten comments are those of myself and other Monsanto staff for purposes of identifying the data in-house.

This should give you a picture of what each operating unit Research and Environmental staff thought might be our potential sources of incidental PCB generation in the summer of 1981. You can compare these processes with the EPA contractor list of 200 and other Monsanto processes we deemed to be of no concern to see the divergence of opinion between industry and EPA.

If you have specific questions, please phone me.
