The Stop Box is the first step to 100% efficiency.

The Stop Box helps you meet MC-8 requirements.

The Stop Box reduces inventory.

The Stop Box ends parts chasing.

The Stop Box cuts downtime.

In-service vehicles operating interstate, are under the jurisdiction of the Bureau of Motor Carrier Safety (BMCS). Section 393 of BMCS regulations cover air brakes. BMCS regulations have been recently revised. The major revision of the regulation is the requirement that all vehicles manufactured after July 1, 1973, must have an emergency braking system that conforms to a stopping distance requirement dependent on vehicle classification. In addition, the revised regulation decreases the allowable service brake stopping distance for all vehicles, regardless of the date the vehicle was manufactured.

Unretouched photography.

Build it right with the Stop
