F. Roush - A2SA
J. R. Savage - B2SL

Based upon the attached correspondence, I have agreed to the temporary disposal of Montar residue in the Texas Ecologists landfill. Disposal in the landfill will be discontinued as soon as the project to modify our John Zink incinerator is completed so we can consume this residue by incineration.

If any of the recipients of this memo do not agree with the decision to temporarily dispose of the Montar residue in the Texas Ecologists landfill, please let me know promptly.
