Attn: Ray Turner

Dear Mr. Turner:

At the present time, we are converting several heavy duty looms to non asbestos woven lining. The looms under conversation manufacture our type M-635L material used to make your part number 205A-9611-P1 only, which you purchased 144 pieces in 1981.

30" Brake (D.C.) In stock we have enough for 67 Brakes about 5 yrs supply. We have no orders.

I am enclosing our test reports detailing the performance to be expected from our non-asbestos equivalent, M-9021-1. It is our goal to accomplish customer conversion to this material by July 1, 1982. I would appreciate you passing this on to your engineering personnel for evaluation.

Samples will be made available. Please let us know what quantity would be required.

If you have any questions or comments, please feel free to call me.

Very truly yours,

Ed Eggert
