ATHERTON MAY ORGANIZE SEPARATE WATER DISTRICT

ATHERTON, May 1.—(Special to the Times.)—Atherton residents want a free supply of drinking water, preferably the clear, non-saline water that comes from the Hetch Hetchy reservoir through the Hetch Hetchy water.

Atherton residents are dissatisfied with the water supply of the town. They are dissatisfied with the water supply of the town. They are dissatisfied with the water supply of the town.

County Engineer Clarence H. Walters pointed out that Atherton and the surrounding area have a natural water supply and because of the close proximity of the Hetch Hetchy reservoir to the city limits, it would be possible and feasible to create a separate water district.

The board of supervisors of the county approved the first step of a plan to create a separate water district. The plan is to create a separate water district.

A committee to study the situation was appointed. The committee will study the situation.
