The Standard for Exposure to Asbestos Dust promulgated in the Federal Register Vol. 37, No. 110, Wednesday, June 7, 1972 by the Department of Labor under the authority of OSHA of 1970 becomes effective July 7, 1972.

The Standard prescribes a specific caution label which must be affixed to all raw materials, mixtures, scrap, waste, debris and other products containing asbestos fibers or to their containers so that during any reasonably foreseeable use, handling, storage, disposal, processing or transportation, no airborne concentrations of asbestos in excess of the exposure limits prescribed.

PLAINTIFF'S EXHIBIT tabbies WV-001100

At the present time the caution labels prescribed in OCF Purchase Acceptance Standards PAS.2.1.13 and PAS.2.1.43 all dated 6-14-72 do not contain the exact wording noted in the Standard. From a health warning standpoint the OCF and OSHA caution label wording are reasonably similar.

It would be wise to determine if the two labels are legally similar enough so an OCF label change is unnecessary. In the event it is determined a label change is required it may be advisable to request a variance in order to use the labeled cartons already in stock and to cover the period until asbestos is removed from Kaylo products and possibly Fyrcor Products.

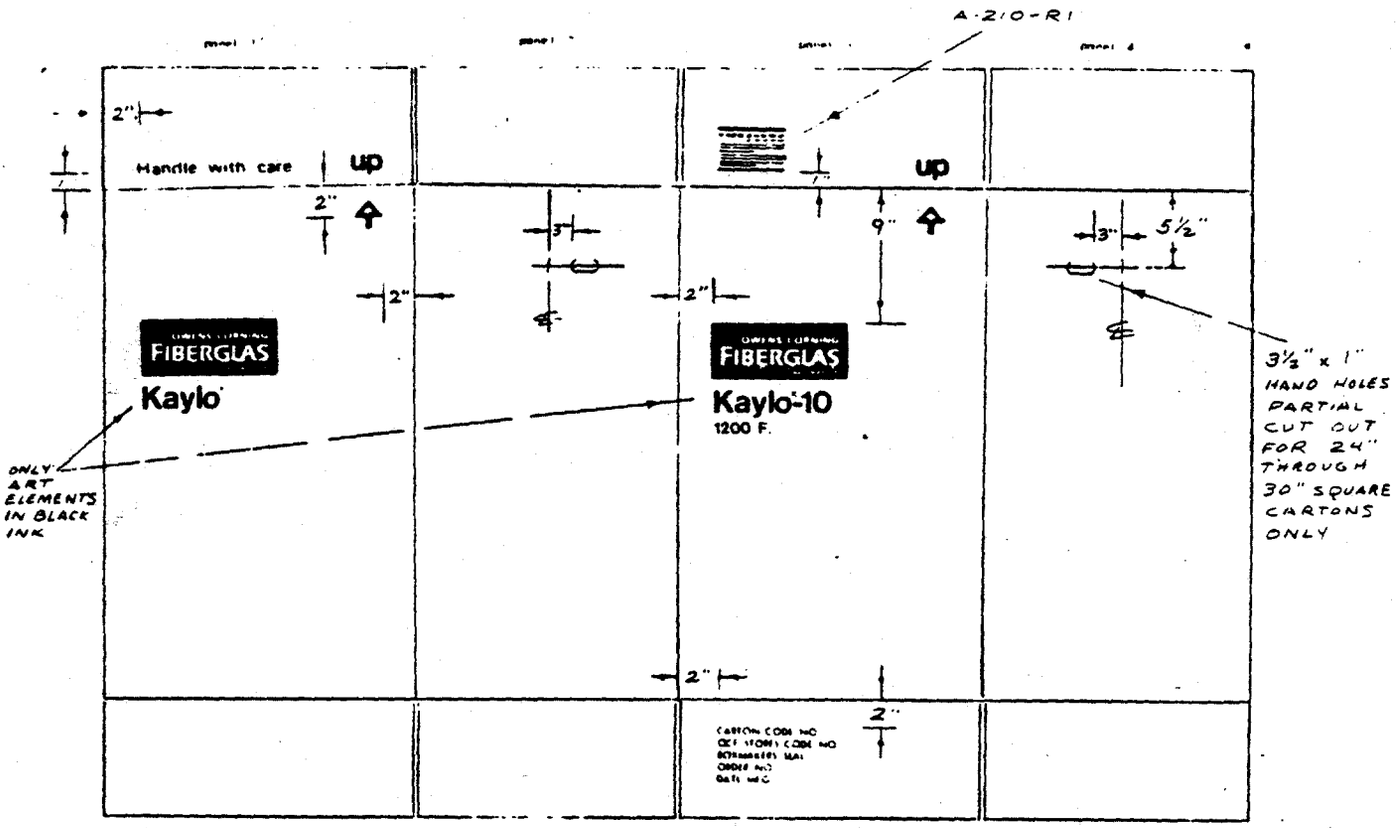

The procedure to request a variance is outlined under Rules of Practice for Variances - Exemptions Under the Occupational Safety and Health Act (Code of Federal Regulations, Title 29, Chapter XVII, Part 1905, 36 F.R. 12290). Subpart B - Applications for Variances, Limitations, Variations, Tolerances, Exemptions and Other Relief, paragraph 1905.11 Variances and other relief under Section 6 (d). This information is also contained in the BNA Occupational Safety and Health Reporter, Page 41:4101.

If it is determined a variance is required it is suggested this be done through the Legal Department.

If you have any questions or comments please contact me.

Handle with care
A-260 (7¼" LONG)

Kaylo® A-277 PANEL #3. ONLY (5⅛" LONG)

CAUTION— PRODUCT CONTAINS ASBESTOS FIBER

INHALATION OF DUST IN EXCESSIVE QUANTITIES OVER LONG PERIODS OF TIME MAY BE HARMFUL.

AVOID BREATHING DUST.

IF ADEQUATE VENTILATION IS NOT POSSIBLE, WEAR RESPIRATORS APPROVED BY THE U. S. BUREAU OF MINES FOR PNEUMOCONIOSIS PRODUCING DUST.

A-210-R1 (4" x 2⅝")

up

A-267 (2½" x 5⅛" TALL)

The following chart is to be used when establishing the size of the logotype in relation to the size of the package. The appropriate size is based upon the dimension of the narrower side of the panel, be it the length or depth.

When the dimension of the narrower side of the panel is between

2" and less than 7½"	use A-230 logo	3½" long.
7½"	9½"	4"
9½"	12"	5"
12"	15"	6½"
15"	19"	8"
19"	24½"	10"
24"	32"	13"
32"	41"	17"
41"	52"	22"
52" and over		28"

QWENS/CORNING FIBERGLAS TRADEMARK®

A-230

1"

Kaylo®-10
1200 F.

A-289 PANEL #1. ONLY (7⅞" LONG)

If the dimension of the wider side of the panel is equal to (or larger than) twice the dimension of the narrower side, use the next larger logotype.

In order to eliminate possible deviations from corporate identity, printing dies should be ordered from The Pannier Corporation, 207 Sandusky Street, Pittsburgh, Pennsylvania 15212. Specify art element number and the length (example A-230, 13" long).
If the printing dies are to be ordered elsewhere, a glossy print of the original art may be obtained from Pannier.

For A-230 logotype 10" long and over, the TRADEMARK® shall measure 2¾" long. For A-230 logotype 8" long and under, the measurement shall be equal to the distance from the left edge of the letter "L" to the right edge of the letter "S" in FIBERGLAS (see above print of logo) and shall be readable when printed. These dimensions pertain to carton printing only.

Art elements printed to match Black ink and PMS #2008 Red ink.
