C. Kleist

Excess lime was sewered in Dept. 264 on two different occasions to provide a neutral effluent at the waste treatment plant. The first occasion occurred when Aroclor was accidentally dumped into the sewer while cleaning a trailer. Approx. 15,000# of additional lime was sewered (above normal usage) to neutralize the sewer.

During the week of December 14, at the request of Carl Kleist, 395,000 pounds of lime was sewered to provide a neutral effluent at the waste treatment plant. This request was also associated with work involving Aroclors.

The amount and proper charges for the lime usage is listed below:

Amount(1)	Charge
15,000# Lime	2-3-91028-590
395,000# Lime	2-3-81100-667

(1) Lime cost approx. 1¢/#.

Ronald R. London
